SUMMARY

Programmer with a background in learning and development and psychology passionate about creating functional, user-friendly, and aesthetically pleasing web applications. Successfully works with a team to complete and implement projects utilizing collaboration and time-management skills.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, jQuery, Git, GitHub, Bootstrap, Firebase, Media Queries, APIs, command line, AJAX, JSON, Node JS, MySQL, Sequelize, Express, MongoDB, Mongoose, React, Java, Python

EXPERIENCE

Programmer I - *NORC at the University of Chicago* - Chicago, IL   6/2019-present
- Investigate and resolve application and data problems for the in-house web case management system (NORCSuite); provide Tier 2 support on multiple projects collecting data across the country
- Part of two-person development team responsible for updating the project's case management system including removing the Java Applet from modules, converting one module from a desktop application to a web application, and making customizations based on end-user feedback to meet the project's needs
- Develop features or customizations to tailor NORCSuite to specific projects

Learning & Development Coordinator - *Things Remembered, Inc.* - Highland Heights, OH   9/2016-4/2019
- Ensured best practices were consistently communicated and trained effectively across the organization by developing and implementing strategic training programs
- Improved the efficiency and accuracy of the field management training compliance reporting by validating the incoming data and streamlining the process to pull the data together

PROJECTS

Operation Lighthouse
- Created and continue to manage the website for the non-profit focused on guiding startups through the challenges presented by substance use disorder
- Established mailing list, connected it to the website, and created email campaigns to notify the audience when new content is published
- Squarespace, Mailchimp

RouteVisor
- Application displays route, plots stops and suggested lodging based on user-input of number of miles between stops
- Responsible for making the application mobile responsive, displaying the written directions, and general debugging
- HTML5, CSS3, JavaScript, jQuery, Bootstrap, Google Maps API, OpenWeatherMap API, Firebase, Heroku
